

COMMERCIAL APPLICATIONS

YNOTLOC - CABINET LOCK

CASE STUDIES | C02

OVERVIEW

Securing cabinets in retail stores is vitally important to ensure the stock is safe. YC10 cabinet locks are a secure, easy to install solution that offers complete security at a low price. A multitude of locking devices can be used to control the locks from a concealed push button to a finger print reader.

With access control now common place, the YC10 locks are not only offering retailer's confidence that their valuable items are secured, but also the ability to track when a cabinet has been opened and by whom.

KEY FEATURES

- Access control integration
- The ability to lock both cupboards and drawers
- Daisy chained system allows easy wiring
- The strength to prevent forced entry
- Automatic relocking
- Easy to install with the supplied patented installation aid
- A large range of options available.
