YNOTLOC - DOOR LOCK

CASE STUDIES | D02

OVERVIEW

For over 25 years electronic deadbolting door locks have been produced by the team at Magna. YNOTLOC – Door locks are found around the world branded with our local distributors mark or our own in house name of YNOTLOC.

Offering developers several key benefits, some major sites in Auckland, New Zealand have used the locks and accessories which they sourced from local distributors.

KEY BENEFITS

- Access control integration
- Versatile installation – vertical or horizontal orientation rebated into or surface mounted onto doors and frames
- Suitable for glass doors and frames with the aid of available accessories
- Multiple voltage input
- Full monitoring – door, bolt and key position monitors are standard
- High physical strength of 1000 – 2000kg holding force
- Current reduction to reduce heating and power loss
